# NZ Analytics

# NZ Analytics Accounts

Accounts with the Design Analytics role in the Network Zone are coordinated by WRLC Headquarters. All accounts are individual accounts; no generic or group accounts for Alma Analytics in the NZ will be created for library staff.

To request an account, please complete the [NZ Analytics Account Agreement Form](#) where you agree to follow the rules regarding sensitive information (i.e. [PII](#) and Acquisitions data) and the use of shared folders in Analytics. WRLC will provision your account and provide your credentials for logging in; unless otherwise noted, accounts will expire after two years.

# NZ Local Parameters

Below is a list of all Local Parameters configured in Analytics for Network Zone records.

<b>Parameter</b>	<b>Field</b>
Local Parameter 1	300
Local Parameter 2	592

Keep in mind that you may see more Local Parameters in NZ Analytics than what is listed above; this is because NZ Analytics includes all Local Parameters configured in each individual Institution Zone, in addition to those configured for the Network Zone. It can be helpful to add the Institution Code column to your Analytics report in order to see which Local Parameter is associated with which Institution Zone.

Network Id	MMS Id	Title	Local Param 01	Local Param 02	Local Param 03	Institution Code
9910783950204101	991005741589704112	Disolución y liquidación de sociedades /	gvp 09-05-08	HLS HLS OCLCQ	Bhala, Raj 2000	01WRLC_GWALAW

# Helpful Tips on Analytics

## Loans - Linked from other Institution column

The Loans - Linked from other Institution column is available in the Fulfillment subject area of Analytics. This is a helpful column that can be used to find Automated Fulfillment Network (AFN) / Consortium Loan Service (CLS) loans.

Please take note that since the column "Loans - Linked from other Institution" was first introduced to Alma in March 2021, the data is not available for older loans and, therefore, also not available in Analytics (as documented in Salesforce case #08435995).
