

Updating the Landing Page using Landing Page Configuration

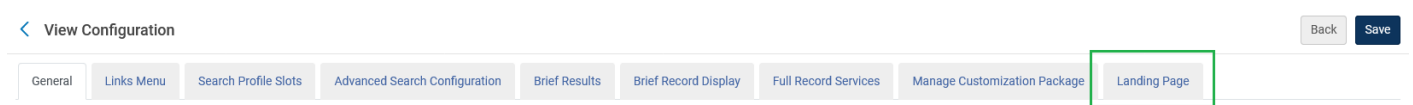

Using the Landing Page tab and Labels to manage your view's landing page, e.g. https://wrlc-gu.primo.exlibrisgroup.com/nde/home?vid=01WRLC_GUNIV%3AGUQ&lang=en

Role required: Discovery Administrator OR View Management

Landing Page tab

To access the Landing Page Configuration tab, navigate to your view: Discovery > Display Configuration: Configure Views > Click the three dots button for your view > Edit

The Landing Page tab is the last one listed:

When you click on it, make sure the "Enable configuration" box is checked. Otherwise, your changes won't be visible in Primo.

Images, Links, and Elements

The Images section is for uploading custom images for the Home Page Background (behind the search bar) and the About the Library section. Recommended image dimensions and filetypes are in the [Ex Libris documentation about Configuration Changes for the Landing Page](#) (opens in new tab).

The toggles for the Links and Elements controls their visibility; toggling them off is an easy way to hide something that you don't currently need --e.g. if you don't have any Announcements to display right now.

Links

You can do all your Links edits from this page, just click on the three dots button to access the Description (link text), the linked URL, and the icon shown in Primo.

< Edit Menu Link

Cancel OK

Define Menu Link

Code *

Link1

URL

https://library.qatar.georgetown.edu/about-us/hours/

Label *

Opening Hours

Icon

icon14.svg

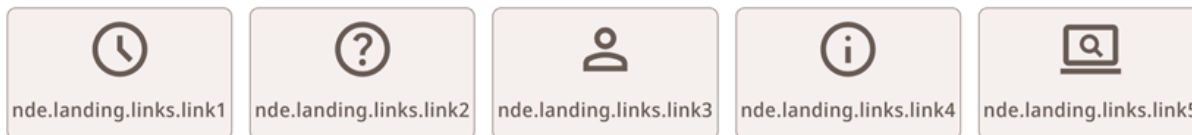

A list of the icons and their filenames is in the [Ex Libris documentation about Configuration Changes for the Landing Page](#) (opens in new tab).

Elements

The Elements are the sections on the NDE landing page; the only thing you can do here is turn them on or off. So, for example, if you don't want the Links section to display, you'd toggle it off here rather than turning off each link in the Links section--that would still keep an empty section where the links ought to be on your Landing Page.

To edit the text that appears within the Welcome, Announcements, and About the Library areas of the page, you need to modify the Labels. You can figure out what label needs to be modified by adding `&debugLabels=true` to the end of your Primo URL, e.g. https://wrlc-gu.primo.exlibrisgroup.com/nde/home?vid=01WRLC_GUNIV%3AGUQ&lang=en&debugLabels=true

What you'll see looks something like this:

nde.landing.links.link1

nde.landing.links.link2

nde.landing.links.link3

nde.landing.links.link4

nde.landing.links.link5

nde.landing.login.title

nde.landing.login.text

nde.landing.login.button

nde.landing.announcements.header

nde.landing.announcements.title

nde.landing.announcements.text

nde.landing.about.title

nde.landing.about.description1

nde.landing.about.description2

☑ nde.landing.about.bullet1

☑ nde.landing.about.bullet2

☑ nde.landing.about.bullet3

☑ nde.landing.about.bullet4

Labels

To access the Landing Page Labels table, navigate to: Discover > Display Configuration: Labels > then search for the correct Labels table --in the screenshot, I searched for *announcement* but you can also search *landing*, for example.

Notice that this label is preceded by the View Code -- this is important if you have more than one view. Any label that is specific to one view MUST have the View Code at the beginning of the label code.

Adding a View-specific label

We want a different announcement title and text for our GU-Q Library, and the 01WRLC_GUNIV:GUQ.nde.landing.announcements.title label doesn't yet exist. So we need to add a new label by clicking Add Row at the top of the list and entering the label code and the desired text. In this case, I'm adding a new Announcement Title for GUQ:

Code: 01WRLC_GUNIV:GUQ.nde.landing.announcements.title

Description (i.e. visible text): New GU-Q Online Resources

The screenshot shows the 'Landing Page Labels' configuration page in the Alma Production interface. The page has a sidebar with navigation options: Alma Production, Collection Development, Acquisitions, Resources, Discovery, and Configuration. The main content area is titled 'Landing Page Labels' and includes a search bar, 'Cancel' and 'Save' buttons, and tabs for 'Values' and 'Notes'. A table lists existing labels with columns for 'Enabled', 'Code', and 'Description'. A modal window is open for adding a new label, with fields for 'Code' (01WRLC_GUNIV:GUQ.nde.landing.anr), 'Description' (New GU-Q Online Resources), and 'Default Value' (No). An 'Add Row' button is visible in the modal.

Enabled	Code	Description
1	nde.landing.about.title	About the Library
2	nde.landing.login.text	Access your account by signi
3	nde.landing.announcements.header	Announcements:
4	nde.landing.links.link3	Ask a Librarian
5	01WRLC_GUNIV:GUQ.nde.landing.links.link3	Ask a Librarian
6	nui.homepage.askLibrarian	Ask a librarian
7	01WRLC_GUNIV:GUQ.nde.landing.links.link4	Contact Us

Click Add Row when you're satisfied with your new text, and the added label will appear at the bottom of the list:

☒	01WRLC_GUNIV:GUQ.nde.landing.announcements.head	GU-Q Announcements	8397964...	06/10/2026	...
☒	01WRLC_GUNIV:GUQ.nde.landing.announcements.title	New GU-Q Online Resources	testroles	07/14/2026	...

When you're finished making label edits, click Save for the whole table. Reload your Primo page, and the new text should appear:

Welcome to the Library

Access your account by signing in and enabling more capabilities

[Go to My Library Card](#)

GU-Q Announcements

New GU-Q Online Resources

Place your text here

Once you've added a view-specific label, it will stay there unless you decide to Delete it, so you only have to add them once. After that, you just need to edit the text as desired.

Editing a label

If you only have one view OR want to edit the default text that appears, you can edit the Description for the default code. Otherwise, make sure you're editing the label for the correct View.

So, for example, if I want the default Announcements text to read "Welcome to our new Primo interface!" I'd edit `nde.landing.announcements.text` to say that, then click the Save button.

	Enabled	Code	Description	Managed in Network	Updated By	Last Updated

20	☒	nde.landing.about.description2	Primo also helps you manage your research. Sign		839796441	05/11/2026	...

The Announcements section now has the new text:

Announcements:

New library resources

Welcome to our new Primo interface!

Any label listed in this table can be edited, just make sure you're editing the correct one.

Label Tips

For labels that have more text than is visible in the text box in Alma (e.g. the announcement text), write your Description text somewhere else first and then copy it in.

HTML tags are allowed in at least some of these labels, so if you want an announcement that links to a page on your library website, you can! (See the Unknowns section below for some caveats.)

If you have multiple labels to add at one time, you can export the list of what exists in Alma, add your new labels to the spreadsheet, and then import the spreadsheet. This has the benefit of re-sorting the labels alphabetically, though it may also change the Updated By and Last Updated field for labels you didn't actually modify.

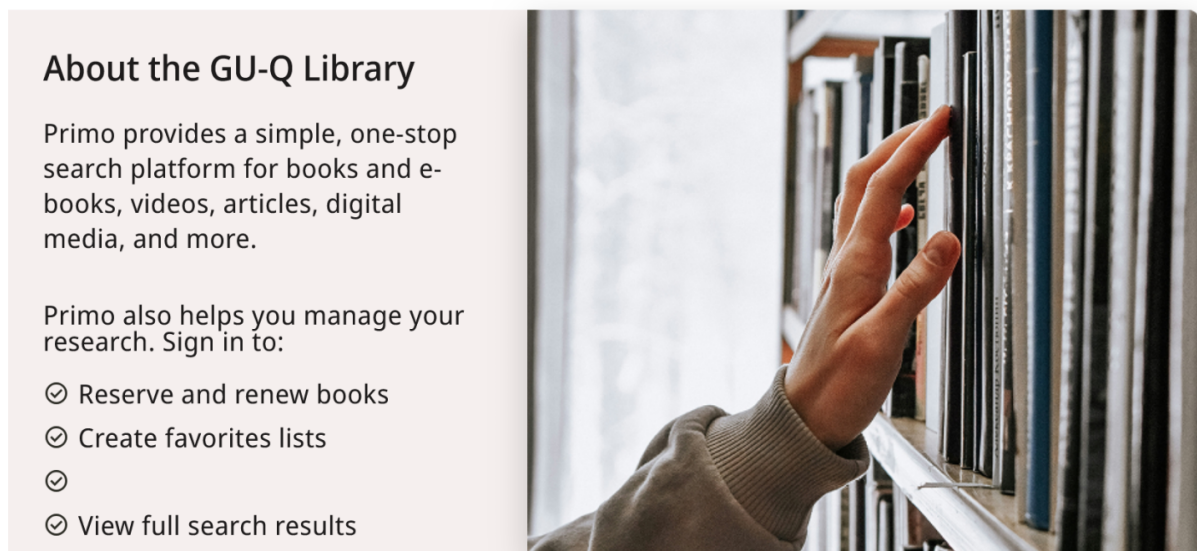

Unknowns

HTML

It's not yet documented which labels on the Landing Page allow HTML or which HTML tags are supported. The [supported HTML tags](#) don't all seem to work--for example, links work in the announcement text, but a bulleted list does not display as expected.

Selective label suppression

Generally speaking, if you want a specific label not to display, you change the Description field to NOT_DEFINED and that suppresses it from Primo. However, doing so for the Landing Page Labels leaves behind odd spaces and sometimes built-in formatting, e.g. if 01WRLC_GUNIV:GUQ.nde.landing.about.bullet3 is NOT_DEFINED, it looks like this:

For the moment, it's recommended to either hide the entire section, or make use of all of the labels that are present.

Revision #2
