

Configuration of Shared Electronic Collections in the Network Zone

A number of electronic collections are managed by the WRLC Consortial Network Zone Manager in Alma's Network Zone; for a full list, see the [Shared Electronic Collections page](#) on the WRLC Wiki, and the [WRLC Shared E-Resources Collections report](#) on the WRLC Intranet.

These collections are a little different than electronic collections in an Institution Zone, for the following reasons:

1. All bibliographic records and electronic portfolios exist in the Network Zone. You can search for the shared electronic collections and shared electronic portfolios in Alma by doing a Network Zone search. All shared collections have "(WRLC)" in the collection name.

Search results for "History of England's Cathedrals".

Facets: Institution, Network, Community

 CDI Last Market Update: 29/11/2023

Available For (13) CDI Other details

AMU; AMULAW; CAA; DOC; GAL; GML; GUNIV; GUNIVLAW; GWA; GWAHLTH; GWALAW; HOW; MAR

2. Access to the collections is given to specific Institution Zones. This is configured for each shared collection in the Network Zone under a special tab called *Group Settings*.

Electronic Collection Editor Cancel Save

Electronic Collection Description | General | Additional | Notes | **Group Settings** | History | CDI

Alt + 1 This tab has content Alt + 5 + Add Settings For Group

	Group Name	Group Members	Parameters	
1	GWAHLTH	01WRLC_GWAHLTH	✓	...
2	HOW	01WRLC_HOW	✓	...
3	MAR	01WRLC_MAR	✓	...
4	GUNIV	01WRLC_GUNIV	✓	...
5	GWALAW	01WRLC_GWALAW	✓	...
6	DOC	01WRLC_DOC	✓	...
7	GUNIVLAW	01WRLC_GUNIVLAW	✓	...
8	CUALAW	01WRLC_CUALAW	✓	...
9	AMU	01WRLC_AMU	✓	...

3. There are two available Proxy settings for Institution Zone access to shared electronic collections:

- No Proxy
- Use the configured Default Proxy settings; this is configured in each IZ under **Configuration > General > External Systems > Integration Profiles**. The code for the Integration Profile is PROXY_DEFAULT.

Electronic Collections in the Network Zone CANNOT use any other proxy integration profile that is NOT the default proxy integration profile.

LIBRARY Configuring: American University

Alma Production Back

Integration Profile List

Name	Code	Description	Integration Type	Managed In Network	Updated By	Status Date
11 OpenAthens Proxy	PROXY_DEFAULT	App looks for in the Job Finish Webhook.	Resolver Proxy		AU2594895	07/12/2022

4. CDI settings for electronic collections in the Network Zone are individually configured for each IZ that has access to a specific collection. For more information about the CDI settings used for NZ e-collections, please see the [Configuration of CDI Settings for Shared Electronic Collections](#) page.
